

How to Create a Video Slideshow to use on any Smart TV

Tools Needed:

- USB DRIVE (at least 4GB)
- Smart TV with USB port
- TV Remote // Tested on LG and Samsung Smart TV

Step 1

Go to www.rethinkjunkbylaura.com, log in and go to retailers area. Find the tab “Slideshow Videos”, click and download each available video. To download the video, click on each link, then locate the three dots in the bottom right of each video window, click and find the option download. Save them on any local folder

Step 2

Plug in the USB to the computer and move all the videos to the USB drive and eject the drive

Step 3

Plug in the USB to the Smart TV. Turn the TV on and Use the TV Remote to select the source (Media Button)

Locate the USB port on the Smart TV, on most cases is beside the HDMI ports

Step 4

Use the arrows and Enter button to locate and select “Videos” option, you’ll see the entire list of videos. Play the first video.

Step 5

To loop the videos: while the video is running, click on the “tools” button and locate the Repeat Mode Option: It should be OFF, change to “ALL” then Enter and close the “tools” menú. If you prefer, you can find the repeat option on the reproduction menu at the bottom of the screen, change the icon until you see the loop option.
