

3 Simple Steps

1. Prep It! Spray The Prep onto your project - let it sit for 2-3 minutes. Wipe with a clean soft cloth. No rinsing necessary. If project is super slick, wipe down with a scrubby pad and then prep again with a clean cloth.

2. Paint It! No fancy brushes needed. Usually takes two coats. Don't apply first coat too thick - this allows it to dry quicker and adhere fabulously!

3. Personalize it! After you finishing painting and your project is dry you can personalize it! Do what makes you happy. Here are some options:

- **Distress it** - I use an electric sander and 80-120 grit sandpaper
- **Glaze it** - Choose our Dark Glaze or our Tintable Glaze (add any paint to make a custom glaze). Brush on your project and blend/erase with a lightly damp cloth and a gentle touch till you get the look you want.
- **Seal it** - We recommend using Tuff Top on horizontal or high use surfaces.

Our Product Line

24 gorgeous colors available.

The Prep

Amazing cleaning product - first step for a successful project.

Dark Glaze

This product is designed to help you add a vintage look to your project. Formulated to look great with any of our paint colors.
